

2016-2017 Annual Report

About Sask Wheat

The Saskatchewan Wheat Development Commission (Sask Wheat) was established in June 2013. The Commission, with its producer-elected and directed board, ensures that producers have the resources, leadership, and provincial, national or international representation to strengthen Saskatchewan's competitive advantage and to ensure producers' and Saskatchewan's interests are protected. Check-off dollars administered by the Commission will go towards research and market development initiatives that improve wheat varieties, grow their marketability and provide higher value to producers.

Our Vision

That wheat is a sustainable, profitable and internationally competitive crop capturing the benefits for Saskatchewan farmers and the community.

Our Mission

To provide leadership in identifying and supporting research, market development and advocacy that contributes to profitable and sustainable wheat production for Saskatchewan farmers.

Strategic Priorities

Research

GOAL: Maximize direct financial benefit to Saskatchewan producers through yield gains, improved quality characteristics and agronomic efficiencies.

Advocacy/ Communications

A: Advocacy / Advisory Function GOAL: To represent the interests of Saskatchewan wheat producers to governments, their respective agencies or representatives, corporations and non-governmental organizations.

B: Communications / Producer Relations GOAL: To communicate regularly with producers and the public.

Market Development

GOAL: Promote Canadian wheat in a way that increases value, marketability and provides a greater net return to producers.

Administration

GOAL: To facilitate an organizational structure with strong leadership at the board and executive administration level, accountable to Saskatchewan wheat producers and with the flexibility to meet the demands of producers, processors, and consumers, whether domestic or international.

The Saskatchewan Wheat Development Commission (Sask Wheat) has made significant strides over the past four years, making strategic decisions that are and will be benefitting Saskatchewan's wheat producers.

As I reflect on the past crop year, it is not the challenges that come to the forefront, but rather the response of producers to those challenges and the tools they had available to meet their needs. Even in a year with an early snowfall and widespread fusarium head blight damage, most producers were able to minimize the damage to their crop and find opportunities to market their wheat.

The 2016-2017 crop year provided ample evidence of the benefit of farmer-funded wheat research and variety development, with several varieties performing well in spite of drought conditions in much of Saskatchewan during the 2017 growing season. Midge-tolerant CWRS varieties also continue to be popular and are delivering results to many producers.

Farmer funding is a critical component of research and breeding, as nobody knows what is happening in the fields better than the farmers growing the crops. The Board of Directors of Sask Wheat is focussed on investing farmer money strategically on research, breeding and activities that have the greatest opportunity to improve the bottom lines for Saskatchewan grain farmers.

In 2016-2017, Sask Wheat expended \$2,107,887 on 20 projects. These projects were diverse in nature but were all focussed on issues relevant to Saskatchewan wheat producers, such as drought tolerance, weed control, nitrogen fixation and FHB management. Our Research Committee, which is chaired by Laura Reiter and includes Ken Rosaasen and Sask Wheat staff, have done a tremendous job of integrating Sask Wheat with the major funding programs in Saskatchewan and Alberta and in providing oversight to determine the optimal projects for Saskatchewan farmers to invest in.

Sask Wheat was very active in the past year in advocating for a fair transportation system for Canadian grain. Sask Wheat and our transportation coalition partners,

the Agricultural Producers Association of Saskatchewan (APAS) and the Saskatchewan Barley Development Commission (SaskBarley), made two trips to Ottawa after changes to the Canada Transportation Act were announced by Minister of Transport Marc Garneau in November 2016. While we were pleased that our voices were heard on the retention of the Maximum Revenue Entitlement (MRE), we are still asking the federal government to complete a formal costing review.

Collaborating with other commissions and organizations is essential to Sask Wheat. This year, coinciding with the end of the Western Canadian Deduction (WCD), Sask Wheat, the Alberta Wheat Commission and the Manitoba Wheat and Barley Growers Association formed the Canadian Wheat Research Coalition (CWRC). The CWRC will facilitate a collaborative approach to producer funding of regional and national research projects in variety development and agronomy including the next Canadian National Wheat Cluster and core wheat breeding agreements with Agriculture and Agri-Food Canada and universities.

Sask Wheat is also collaborating with the wheat commissions in Alberta and Manitoba and with grain companies on a renewed representative governance model and strategic direction for the Canadian International Grains Institute (Cigi). The collaborative approach taken by the three provincial commissions with the Cigi Board of Directors followed from a memorandum of understanding signed by the commissions in January 2017, which signalled the continued commitment to provide producer funding to Cigi as well as to core wheat breeding activities currently being funded through the WCD via the Western Grains Research Foundation (WGRF).

Sask Wheat will continue to work hard on behalf of Saskatchewan's wheat producers. I am proud of the hard work and strategic decisions of our Board of Directors and staff. I'm confident the work we are completing now will have a long-term, positive impact on Saskatchewan's grain farmers for years to come.

The 2016-2017 crop year was challenging for wheat producers. Many had large wheat yields in 2016 but faced downgrading due to diseases like fusarium head blight and wet, cold conditions during harvest. This was followed by widespread drought in 2017 which impacted both yields and quality.

In a year with significant uncertainty, Sask Wheat worked hard to profile producers' levy dollars to increase profitability from growing wheat. Our fusarium head blight risk maps were a popular tool in both 2016 and 2017, although the conditions were markedly different between the two growing seasons. We also funded and co-hosted the wheat midge risk map, which was compiled by the Saskatchewan Ministry of Agriculture.

In addition, we hosted two successful Think Wheat events in Rosetown and Humboldt, which brought the latest information on marketing, varieties, agronomy, and disease and pest management to producers. Sask Wheat also brought in excellent speakers such as Peter "Wheat Pete" Johnson for CropSphere 2017, which we hosted with five other Saskatchewan crop commissions. We will continue to host these events to bring producers information that will benefit their businesses.

Sask Wheat's role as an advocate for farmers was central to our activities in the past year. Nowhere was this more evident than with transportation. We have been working in a coalition with the Saskatchewan Barley Development Commission (SaskBarley) and the Agricultural Producers Association of Saskatchewan (APAS) that has been unique in providing a "pure producer" voice in the transportation discussions. The research we have undertaken has demonstrated that producers' bottom lines are significantly impacted when grain handling and transportation capacity is lower than that required by producers.

While we were pleased with the provisions of the Transportation Modernization Act, which was introduced in May 2017, we are now focusing on the regulations for the new legislation, the details of which will have a major impact on producers. The transportation coalition submitted a brief to the Standing Committee on Transportation, Infrastructure and Communities and we continue to call for a formal costing review to be completed before the regulations are in place.

Sask Wheat continues to grow and evolve as an organization. 2016-2017 saw the end of the Western Canadian Deduction, with Sask Wheat, the Alberta Wheat Commission (AWC) and the Manitoba Wheat and Barley Growers Association (MWBGA) assuming the former Western Canadian Deduction (WCD). These funds are earmarked to fund the Canadian International Grains Institute (Cigi) and the ongoing varietal development work undertaken through the core wheat breeding agreements with Agriculture and Agri-Food Canada and the western Canadian universities.

The end of the WCD opened the door for expanded collaboration between wheat commissions and the creation of a new entity, the Canadian Wheat Research Coalition (CWRC). This newly formed coalition, which consists of Sask Wheat, AWC and MWBGA, will work to synchronise efforts regarding national and regional wheat research with a long-term strategy of improving net profitability of wheat production.

Starting in late 2017, with coordination and collaboration on the Canadian National Wheat Cluster, the CWRC will be the vehicle for wheat producers' participation in strategically important regional and national wheat research. We also expect that the CWRC will be used as the vehicle to assume future responsibility for the next round of core wheat breeding agreements with Agriculture and Agri-Food Canada and the Prairie universities. This formalized collaboration through the CWRC is the natural continuation of the already high level of collaboration between the three wheat commissions on varietal development and research efforts.

Growing wheat is becoming more challenging, as wheat producing regions from across the globe continue to narrow the quality gap and sell at competitive prices. It is therefore crucial that Canadian wheat producers focus on collaboration and funding innovation to bring longterm benefits to growers and hopefully enhance the resiliency and profitability of wheat in future production.

Valar Gurusamy Research Program Assistant

Research

Objectives

Sask Wheat has producer and profit oriented research as a key priority. The objective of the research program is to build research relationships and identify and invest in research and development initiatives in three main priority areas:

- Variety development genetics and breeding methods, including molecular/ pre-breeding, breeding, pathology/ entomology, quality and performance testing
- *Production* agronomy and cropping systems, fertility management, weed/ disease/pest management, production management
- Post-production storage, end-use quality, new uses, economic/regulatory analysis, processing and value-added initiatives

In 2016-2017, Sask Wheat further developed partnerships with other research-focussed organizations, notably the Alberta Wheat Commission and the Manitoba Wheat and Barley Growers Association, along with governments, and private organizations. These partnerships will be critical in leveraging research funding in order to maximize return on producer investment in research.

Research Commitments

In the 2016-2017 crop year, the Board of Directors of Sask Wheat expended \$2,107,887 on 20 projects.

Ultimately, our research program aims to improve crop management, reduce input costs and environmental impact, and increase yield and quality of grain for Saskatchewan producers.

Canadian Wheat Reasearch Coalition

The Alberta Wheat Commission (AWC), the Saskatchewan Wheat Development Commission (Sask Wheat) and the Manitoba Wheat and Barley Growers Association (MWBGA) have formed the Canadian Wheat Research Coalition (CWRC), a federal not-for-profit corporation that will facilitate long-term investments aimed at improving profitability and competitiveness for western Canadian wheat farmers.

The CWRC will facilitate a collaborative approach to producer funding of regional and national research projects in variety development and agronomy including the next Canadian National Wheat Cluster and core wheat breeding agreements with Agriculture and Agri-Food Canada and universities. Additional regional projects that align with variety development and agronomic priorities will also be considered for funding through the CWRC.

The three wheat commissions will serve as founding members on the farmer-led board of directors. The structure allows for additional producer or private sector groups that share an interest in advancing wheat research in Canada to join as organizational members.

The CWRC will be administered by a host commission, which will rotate every three years starting with Sask Wheat.

Funded Projects - 2016/2017

Nitrogen Fixation in Triticale and Wheat

Term: 3 years, beginning in 2017 Funding Amount: \$86,250

Lead Researcher(s): Dr. François Eudes (Agriculture

and Agri-Food Canada)

Funding Partners: Alberta Wheat Commission

Establishment of LC-MS/MS based mycotoxin / Deoxynivalenol (DON) Diagnostic platform for FHB research and breeding program

Term: 2 years, beginning in 2017 Funding Amount: \$112,746

Lead Researcher(s): Dr. Randy Kutcher (University of

Saskatchewan)

Funding Partners: Saskatchewan Ministry of Agricul-

ture - Agriculture Development Fund

Increasing variability in a wheat breeding program

Term: 3 years, beginning in 2017 Funding Amount: \$ 110,975

Lead Researcher(s): Dr. Graham Scoles (University of

Saskatchewan)

Assessment and deployment of a new dwarfing gene in red spring wheat

Term: 3 years, beginning in 2017 Funding Amount: \$81,941

Lead Researcher(s): Dr. Pierre Hucl (University of

Saskatchewan)

Funding Partners: Alberta Wheat Commission; Saskatchewan Ministry of Agriculture - Agriculture

Development Fund

Optimization of root development and photosynthesis parameters for yield increase/protection

Term: 3 years, beginning in 2017 Funding Amount: \$199,496

Lead Researcher(s): Dr. Gopalan Selvaraj (National

Research Council)

Funding Partners: Saskatchewan Ministry of Agriculture - Agriculture Development Fund; Alberta Wheat

Commission

Investigation into converting a combine grain loss

signal into a grain loss rate **Term:** 1 year, beginning in 2017 Funding Amount: \$23,848

Lead Researcher(s): Mr. Nathan Gregg (Prairie Agri-

cultural Machinery Institute)

Funding Partners: Saskatchewan Ministry of Agriculture - Agriculture Development Fund; Saskatchewan Pulse Growers; Saskatchewan Canola Development

Commission

Comparing wheat allergenicity in ancient and modern wheats

Term: 3 years, beginning in 2017 Funding Amount: \$98,210

Lead Researcher(s): Dr. Ravindra Chibbar (University

of Saskatchewan)

Funding Partners: Saskatchewan Ministry of Agriculture - Agriculture Development Fund; Western Grains

Research Foundation

Input Study: Intensive Wheat Management

Term: 3 years, beginning in 2017 Funding Amount: \$185,472

Lead Researcher(s): Mr. Stewart Brandt (Northeast

Agriculture Research Foundation)

Funding Partners: Saskatchewan Ministry of Agricul-

ture - Agriculture Development Fund

Field evaluation of one seed treatment inducing multiple agronomic responses from emergence to vield

Term: 3 years, beginning in 2017 Funding Amount: \$106,893

Lead Researcher(s): Dr. Karen Tanino (University of

Saskatchewan)

Funding Partners: Saskatchewan Ministry of Agricul-

ture - Agriculture Development Fund

Development of physiological markers for high throughput field screening of drought tolerant wheat lines

Term: 3 years, beginning in 2017 Funding Amount: \$113,466

Lead Researcher(s): Dr. Karen Tanino (University of

Saskatchewan)

Funding Partners: Saskatchewan Ministry of Agriculture - Agriculture Development Fund

High-throughput omics approaches for effective breeding selection of durum wheat quality

Term: 3 years, beginning in 2017 Funding Amount: \$146,444

Lead Researcher(s): Dr. Wentao Zhang (National

Research Council)

Funding Partners: Saskatchewan Ministry of Agricul-

ture - Agriculture Development Fund

In-Crop Weed Clipping for Weed Control

Term: 3 years, beginning in 2017 Funding Amount: \$106,828

Lead Researcher(s): Dr. Steven Shirtliffe (University

of Saskatchewan)

Funding Partners: Alberta Wheat Commission, Saskatchewan Pulse Growers, Saskatchewan Ministry of

Agriculture - Agriculture Development Fund

Manipulating recombination in crop polyploids

Term: 4 years, beginning in 2017 Funding Amount: \$266,897

Lead Researcher(s): Dr. Isobel Parkin (Agriculture and

Agri-Food Canada)

Funding Partners: Saskatchewan Canola Develop-

ment Commission

Effect of Harvest Residue Distribution on Subsequent Crop Emergence and Performance

Term: 4 years, beginning in 2017 Funding Amount: \$40,796

Lead Researcher(s): Mr. Nathan Gregg (Prairie Agri-

cultural Machinery Institute)

Funding Partners: Saskatchewan Canola Develop-

ment Commission

Harrington Seed Destructor Evaluation at Field Scale in Alberta

Term: 3 years, beginning in 2017 Funding Amount: \$160,490

Lead Researcher(s): Dr. Breanne Tidemann (Agricul-

ture and Agri-Food Canada)

Funding Partners: Alberta Canola Producers Commis-

sion; Western Grains Research Foundation

Identifying resistance to tan spot disease in winter and durum wheat

Term: 3 years, beginning in 2017 Funding Amount: \$103,500

Lead Researcher(s): Dr. Reem Aboukhaddour (Agri-

culture and Agri-Food Canada)

Funding Partners: Alberta Wheat Commission

SK Water Monitoring for Neonicotinoid Insecticides

Term: 1 year, beginning 2017 Funding Amount: \$12,000

Lead Researcher(s): Dr. Claudia Sheedy (Agriculture

and Agri-Food Canada)

Funding Partners: Saskatchewan Canola Development Commission; Saskatchewan Pulse Growers

Expansion of in vitro selection to develop FHB and leaf spot resistant wheat and barley

Term: 3 years, beginning in 2017 Funding Amount: \$138,000

Lead Researcher(s): Dr. Nora Foroud (Agriculture and

Agri-Food Canada)

Funding Partners: Alberta Wheat Commission; Western Grains Research Foundation; Alberta Innovates

SK Varietal Performance Group (SVPG) Trials

Term: Annual (fourth year of funding)

Funding Amount: \$28,500

Funding Partners: Sask Pulse Growers; Saskatchewan Oat Development Commission; Saskatchewan Flax Development Commission; Saskatchewan Seed Growers Association; Saskatchewan Winter Cereals Development Commission; Saskatchewan Barley Development Commission; 2015 Canola Performance

Trials, Saskatchewan Ministry of Agriculture

SK Varietal Performance Group (SVPG) Trials Wheat Enhancement/Extra data

Term: Annual (second year of funding)

Funding Amount: \$62,622

Advocacy and Market Development

Transportation

Sask Wheat along with our producer coalition partners, APAS and SaskBarley, have continued to be actively involved in transportation policy and advocating on behalf of Saskatchewan producers.

Producer coalition members travelled to Ottawa in February and April 2017 to meet with federal officials from Transport Canada and Agriculture and Agri-Food Canada, as well as Members of Parliament. The producer coalition made it clear this was an extremely complex review of grain transportation and politicians and bureaucrats needed to understand the direct implications for grain producers. The coalition provided a "pure producer voice" to outline the potential negative impacts if regulations did not take grain producers' interests into account.

Bill C-49, the Transportation Modernization Act, was introduced in May 2017. The producer coalition was optimistic about Bill C-49, which would amend the Canada Transportation Act; however, the coalition was concerned about Bill C-49 being passed in time to cover the transportation of the 2017 crop. The producer coalition called for Bill C-30, the Fair Rail for Grain Farmers Act, to be extended if Bill C-49 was not passed in time.

The producer coalition also made a submission to the Standing Committee on Transport, Infrastructure and Communities in September in response to Bill C-49. The coalition was encouraged to see the Maximum Revenue Entitlement (MRE) maintained in Bill C-49. However, the coalition highlighted the need for a full costing review to be completed to accurately represent the costs of shipping grain in the MRE.

Trade: Renegotiating the North American Free Trade Agreement (NAFTA)

The renegotiation of NAFTA has been a critical trade issue for Sask Wheat in 2017, and Sask Wheat has been actively involved in the consultation process. Sask Wheat first sent a letter to Minister MacAulay and sent out a news release in June 2017, in the wake of calls to accommodate American-grown wheat in the Canadian grain grading system. Sask Wheat strongly supports the important function that Canada's grain registration and grading system provides, and called for thorough consultations to occur before any changes are made to the Canada Grains Act.

In July 2017, Sask Wheat submitted a written response to the federal government's NAFTA consultations. In this response, Sask Wheat raised other important non-tariff trade barriers that should be updated and harmonized under NAFTA, such as Sanitary and Phytosanitary (SPS) provisions, Maximum Residue Limits (MRLs) and Low Level Presence (LLP) of biotech crops.

Besides written submissions, Sask Wheat also participated in roundtable discussions with the provincial government in July 2017 and with the federal government in September 2017.

Market access to Mexico and the U.S. is of great importance to Saskatchewan wheat producers, and therefore it is crucial this market access is maintained. Furthermore, it is also important to protect regulations and standards in the Canadian system that are important to the end users of Canadian wheat. Sask Wheat will continue to participate in NAFTA consultations and advocate on behalf of Saskatchewan wheat producers.

Canadian International Grains Institute (Cigi)

In July 2017, Sask Wheat along with the Alberta Wheat Commission (AWC), Manitoba Wheat and Barley Growers (MWBGA) and several grain companies agreed to collaborate on a renewed representative governance model and strategic direction for Cigi. Sask Wheat and AWC have two representatives on Cigi's Board of Directors and MWBGA has one. The Board also has five representatives from the grain companies.

This renewal in governance and strategic direction of Cigi coincides with the wheat commissions assuming the responsibilities and financial obligations of the Western Canadian Deduction (WCD), which ended on July 31, 2017.

Sask Wheat believes that Cigi is an important vehicle to open up and maintain global market opportunities for Canadian wheat and support the profitability of wheat producers. The work Cigi does in technical support and education for global customers adds significant value to the Canadian wheat brand.

Having producer representation around the Cigi Board table is incredibly valuable for producers to have important conversations with industry representatives and continue to build Canada's global reputation as a producer of high quality wheat.

Website Price Information

Sask Wheat is continuing to provide a weekly wheat market outlook report and price information on our website from Mercantile Consulting Inc.

Sask Wheat has received positive feedback on these reports, and the wheat market outlook report is now the most visited page on our website.

The objectives of the market report are to provide wheat market commentary and outlook, provide Saskatchewan elevator bids and grade spreads, provide applicable international wheat values relative to Saskatchewan elevator bids, and establish the basis between FOB (free-on-board) prices for wheat and Saskatchewan elevator bids. As well, the report is meant to illustrate the importance of the basis and help farmers interpret wheat basis levels by indicating unusual circumstances such as logistic issues, stock issues or international issues.

Price discovery and market transparency are important issues to Sask Wheat, and this initiative provides farmers with valuable information on the wheat market both domestically and internationally.

Communications

CropSphere and AGM

The fourth annual CropSphere conference was held at Prairieland Park alongside the Western Canadian Crop Production Show for the first time in 2017.

The conference was a tremendous success, with 642 people attending the two-day event. Sask Wheat hosted CropSphere along with SaskBarley, SaskCanola, SaskFlax, SaskOats, and the Saskatchewan Pulse Growers. CropSphere 2017 featured two full days of sessions focusing on the latest news in production, marketing, and research.

Sask Wheat brought in Peter "Wheat Pete" Johnson to talk about wheat agronomy and Dr. Randy Kutcher from the University of Saskatchewan (pictured below) to speak about fusarium head blight management. The keynote speakers for CropSphere included David Frum, senior editor of *The Atlantic*, and Mike Jubinville, lead analyst and president of Pro Farmer Canada.

The Sask Wheat Annual General Meeting was held on the second day of CropSphere. Following the AGM, Sask Wheat hosted the first Wheat Producers' Forum, where wheat producers were able to ask the Directors and staff of Sask Wheat any questions about the organization.

Think Wheat

Sask Wheat hosted the Think Wheat extension meetings in Rosetown and Humboldt in early March of 2016. Think Wheat is aimed at providing wheat producers with the most up-to-date and relevant information about producing and marketing their crops.

More than 100 producers and agronomists attended the meetings, hearing from six speakers. The agronomy session contained up-to-date information in the areas of sprayer technology, wheat varieties to consider from the 2017 Seed Guide, and disease and pest management. The marketing sessions provided information on grain grading, the basics of marketing grain, market export basis, and the global market outlook.

Semi-Annual Meeting

Once again, Sask Wheat held our Semi-Annual Meeting in Regina during Canada's Farm Progress Show. Our keynote speaker was Dr. Mario Tenuta (pictured above) of the University of Manitoba. He spoke about nitrogen loss when applied at shallow depths and the future of nitrogen management.

FHB Risk Maps and Pre-Harvest Herbicide Campaign

For the third-straight year, Sask Wheat hosted fusarium head blight risk maps on our website during June and July. There was a significant spike in map views in late June, with over 5,000 unique views during the growing season.

Sask Wheat also published a Fusarium Management Guide, which was distributed to producers with our March newsletter. The guide included management strategies from Mitchell Japp and Barb Ziesman of the Saskatchewan Ministry of Agriculture and spraying tips from Dr. Tom Wolf.

In late July and early August, Sask Wheat conducted an awareness campaign encouraging producers to spray pre-harvest herbicides according to the label to avoid unnecessary residue left in wheat kernels. The campaign included radio commercials in four centres across the province and resources on the Sask Wheat website, showing producers how to check if wheat kernels are at or below the 30 percent moisture threshold for spraying.

Scholarships

The Sask Wheat essay awards for undergraduate students were awarded at the annual Bean Feed awards dinner of the College of Agriculture and Bioresources in November 2016. The four students who received the \$2,500 Sask Wheat award included two fourth-year crop science majors along with two fourth-year agronomy majors.

The recipients of these scholarships were selected on academic merit as well as an essay. In their essays, the students were required to describe how an area of research has or could benefit the wheat sector while also describing a current challenge facing the wheat sector and how it may be addressed by research.

A fifth Sask Wheat graduate scholarship for a student from the College of Agriculture and Bioresources was also awarded at the 2016 Bean Feed dinner. Graduate scholarship recipients are selected based on academic merit as well as the projected impact of their studies on the wheat industry.

2016 graduate scholarship recipient Tatiana Vera-Ardila (M.Sc.) is pictured here. Her project is on the timing of fungicide application and inheritance of resistance to stripe rust in spring wheat (Dr. Randy Kutcher is her supervisor).

Audited Financial Statements

November 27, 2017

Independent Auditor's Report

To the Board of Directors of Saskatchewan Wheat Development Commission

We have audited the accompanying financial statements of Saskatchewan Wheat Development Commission, which comprise the statement of financial position as at July 31, 2017 and the statements of operations and net assets and cash flows for the year then ended, and the related notes which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

PricewaterhouseCoopers LLP 128 4th Avenue South, Suite 600, Saskatoon, Saskatchewan, Canada S7K 1M8 T: +1 306 668 5900, F: +1 306 652 1315

"PwC" refers to PricewaterhouseCoopers LLP, an Ontario limited liability partnership.

Basis for qualified opinion

In common with many similar not-for-profit organizations, Saskatchewan Wheat Development Commission derives revenue from producer check-off fees, the completeness of which is not susceptible to satisfactory audit verification. Accordingly, verification of these revenues was limited to the amounts recorded in the records of Saskatchewan Wheat Development Commission. Therefore, we were not able to determine whether any adjustments might be necessary to producer check-off fees, excess of revenue over expenditures and cash flows from operations for the years ended July 31, 2017 and 2016, current assets as at July 31, 2017 and 2016 and net assets as at August 1, 2016, July 31, 2017, August 1, 2015 and July 31, 2016. Our audit opinion on the financial statements for the year ended July 31, 2015 was modified accordingly because of the possible effects of this limitation in scope.

Qualified opinion

In our opinion, except for the possible effects of the matter described in the basis for qualified opinion paragraph, the financial statements present fairly, in all material respects, the financial position of Saskatchewan Wheat Development Commission as at July 31, 2017 and the results of its operations and its cash flows for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations.

Notes to Financial Statements July 31, 2017

Nature of business

The Saskatchewan Wheat Development Commission (the "commission" or "SWDC") was established by provincial legislation on June 7, 2013. The activities of the commission are funded primarily by a levy on Saskatchewan produced spring wheat, which is collected by buyers at the time of sale.

The mandate of the commission is to provide leadership in identifying and supporting research, market development and advocacy that contributes to profitable and sustainable wheat production for Saskatchewan farmers.

Summary of significant accounting policies

Basis of presentation

These financial statements include the accounts of the commission and are presented in accordance with Canadian accounting standards for not-for-profit organizations ("ASNPO").

Use of estimates

The preparation of financial statements in conformity with ASNPO requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenditures during the reporting period. Actual results could differ from these estimates.

Cash and cash equivalents

Cash consists of cash balances with banks and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value.

Tangible capital assets

Tangible capital assets are recorded at cost and amortized over their expected useful lives. Computer equipment is amortized using the declining balance method at a rate of 33%. Office furniture is amortized using the straight-line method at a rate of 20%.

Internally restricted net assets

The commission has internally restricted net assets totaling \$1,875,300 comprised of the following: a) Revenue Stabilization Reserve Fund in the event of a crop disaster or revenue-destabilizing event (\$1,000,000) and b) Organizational Reserve Fund in the event of an organizational shut down (\$875,300).

Notes to Financial Statements **July 31, 2017**

f) Revenue recognition

Producer check-off fees are recognized as product is sold from the producer to the buyer. Refunds are recognized using the accrual method based on actual requests submitted by producers for the crop year and are paid out subsequent to year-end by the commission.

The commission follows the deferral method of accounting for contributions, including grants. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured. Restricted contributions for expenses of the current period are recognized as revenue in the current period and restricted contributions for expenses of one or more future periods are deferred and recognized as revenue in the same period or periods as the related expenses are recognized.

Investment income is recognized as it is earned. Contributions of materials and services are recognized only when a fair value can be reasonably estimated and when the materials and services are used in the normal course of the commission's operations and would otherwise have been purchased.

g) Financial instruments

Financial assets and financial liabilities, consisting of cash and cash equivalents, investments, accounts receivable and accounts payable and accrued liabilities are initially recognized at fair value and subsequent measurement is at amortized cost. The commission does not consider itself to have significant exposure to credit risk, currency risk, interest rate risk, liquidity risk, market risk or other price risk.

\$

3 Investments

Investments consist of guaranteed investment certificates which earn interest at rates ranging from 1.05% to 2.27% and mature in the following fiscal years:

	•
July 31, 2018	3,333,906
2019	4,570,464
2020	4,479,570
2021	355,640
2022	360,495
	13,100,075

Notes to Financial Statements **July 31, 2017**

4 Tangible capital assets

			July 31, 2017
	Cost \$	Accumulated amortization \$	Net book value \$
Computer equipment Office furniture	24,776 46,921	21,563 25,381	3,213 21,540
	71,697	46,944	24,753

	Cost \$	Accumulated amortization \$	Net book value \$
Computer equipment Office furniture	20,342 37,267	13,387 15,997	6,955 21,270
	57,609	29,384	28,225

5 Related party transactions

During the year ended July 31, 2017 members of the commission's elected Board of Directors received payments for per diems, expenses and communications allowances of \$119,531 (2016- \$101,243). All related party transactions described above are measured at carrying amounts.

Notes to Financial Statements

July 31, 2017

6 Operating lease

On August 15, 2017 the commission renewed their lease agreement with Saskatchewan Opportunities Corporation, otherwise known as Innovation Place, for office space. The term of the lease agreement is 3 years and future minimum monthly lease payments, including occupancy costs, to the end of the term of the lease on November 30, 2020, are as follows:

	\$
2018	65,662
2019	68,984
2020	70,645
2021	23,548
	228,839

Rent expense for the year ended July 31, 2017 was \$65,735 (2016 - \$60,562).

7 Commitments

The total maximum commitment to projects awarded funding as of July 31, 2017 is \$7,804,231 (2016 - \$5,394,674), of which \$3,821,296 of research expenditures had been incurred as of July 31, 2017 (2016 - \$1,713,419). The total anticipated maximum commitments for these research projects over the next five years are as follows:

	\$
2018	2,020,046
2019	1,273,781
2020	627,882
2021	61,226
2022	<u></u>
	3,982,935

8 Budgeted figures

Budgeted figures have been provided for comparison purposes and have been derived from the estimates approved by the commission's board of directors.

November 27, 2017

To the Board of Directors of **Saskatchewan Wheat Development Commission**

We have audited Saskatchewan Wheat Development Commission's (the Commission's) compliance with the provisions of the following legislative and related authorities pertaining to its financial reporting, safeguarding public resources, spending, revenue raising, borrowing and investing activities during the year ended July 31, 2017:

The Agri-Food Act, 2004 The Saskatchewan Wheat Development Plan Regulations

Compliance with the provisions of the stated legislative and related authorities is the responsibility of management of the Commission. Our responsibility is to express an opinion on this compliance based on our audit.

We conducted our audit in accordance with standards for assurance engagements published in the CPA Canada Handbook - Assurance. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the Commission complied with the criteria established by the legislative and related authorities referred to above. Such an audit includes examining, on a test basis, evidence supporting compliance, evaluating the overall compliance with these criteria, and where applicable, assessing the accounting principles used and significant estimates made by management.

In our opinion, for the year ended July 31, 2017, the Commission has complied, in all significant respects, with the provisions of the aforementioned legislative and related authorities.

Pricewaterhouse Coopers LLP

Chartered Professional Accountants

November 27, 2017

To the Board of Directors of Saskatchewan Wheat Development Commission

We have tested certain controls of Saskatchewan Wheat Development Commission (the Commission) to express reasonable assurance as to their operating effectiveness as at July 31, 2017 related to the objective of safeguarding assets. That is, to ensure assets are not lost or used inappropriately; to ensure the Commission does not inappropriately incur obligations; to establish a financial plan for the purposes of achieving the Commission's financial goals; and to monitor and react to the Commission's progress towards the objectives established in its financial plan.

Scope

The Chartered Professional Accountants of Canada (CPA Canada) defines control as comprising those elements of an organization that, taken together, support people in the achievement of the organization's objectives. Control is effective to the extent that it provides reasonable assurance that the organization will achieve its objectives.

We used the control framework included in the Guidance on Control published by CPA Canada to make our judgments about the effectiveness of the Commission's control. We did not audit certain aspects of control concerning the effectiveness, economy, and efficiency of certain management decision-making processes.

Management responsibility

The Commission's management is responsible for effective control related to the objective described above. Our responsibility is to express an opinion on the effectiveness of control based on our audit.

Our responsibility

Our responsibility is to express an opinion on the effectiveness of control based on our audit. We conducted our audit in accordance with the Canadian Standard on Assurance Engagements 3001, Direct Engagements established in the CPA Canada Handbook - Assurance. Those standards require that we plan and perform an audit to obtain reasonable assurance as to the effectiveness of the Commission's control related to the objective stated above. An audit includes obtaining an understanding of the significant risks related to the objective stated above, the key control elements and control activities to manage these risks, and examining, on a test basis, evidence relating to control.

Our audit on the effectiveness of the Commission's control related to the above objective does not constitute an audit of internal control over financial reporting performed in conjunction with an audit of financial statements in CPA Canada Handbook - Assurance Section 5925, An Audit of Internal Control Over Financial Reporting that is integrated with an Audit of Financial Statements.

PricewaterhouseCoopers LLP 128 4th Avenue South, Suite 600, Saskatoon, Saskatchewan, Canada S7K 1M8 T: +1 (306) 668 5900, F: +1 (306) 652 1315, www.pwc.com/ca

Limitations

Control can provide only reasonable and not absolute assurance of achieving objectives reliably for the following reasons. There are inherent limitations in control including judgment in decision-making, human error, collusion to circumvent control activities and management overriding control. Cost/benefit decisions are made when designing control in organizations. Because control can be expected to provide only reasonable assurance and not absolute assurance, the objectives referred to above may not be achieved reliably. Also, projections of any evaluation of control to future periods are subject to the risk that control may become ineffective because of changes in internal and external conditions, or that the degree of compliance with control activities may deteriorate.

Conclusion

In our opinion, based on the limitations noted above, the Commission's internal controls were effective, in all material respects, to meet the objective stated above as of July 31, 2017.
